<b>Task 1:</b> Use the internet, non-fiction books from the library, and the animal fact files to research an animal found in Japan as assigned by your teacher. Use this sheet to make notes and present your research back to the class.

**Task 2:** As you listen to your classmates' presentations, annotate the map to show where in Japan each of the animals shown can be found.

**Challenge:** Annotate each picture to add extra information about the animals' appearance, diet and habitat.
