

## **Sweatdrop Studios**

Sweatdrop Studios is a UK-based independent publisher and comic collaborative. Since 2001, we've been creating original comics and artwork in a wide variety of genres and styles; publishing single issues, collected volumes, anthologies and light novels.

We are often involved in teaching and instruction, authoring many how-to-draw books for other publishers, writing online tutorials, providing product demonstrations and delivering workshops at events. We specialise in Manga format and techniques!

Our members include professional illustrators and writers with numerous accolades and awards in the comic industry and experience working in other related fields, such as advertising, video game graphics, fashion design and children's publications.

Sweatdrop Studios offers a range of services for clients interested in comics and manga. We can:

- Create bespoke illustrations and artwork
- Create or collaborate on comics and sequential art
- Write instructional books and guides on comic creation
- Deliver workshops and presentations on comics
- Provide product demonstrations and reviews

Please get in touch with Sonia if you would like to know more about the group, or if you are wanting a full programme of workshops or have a large art project requiring several artists.
